Troy, New York

## ABOUT

Samaritan Hospital is a 277-bed community hospital dedicated to providing comprehensive healthcare services to the community. It offers a wide range of inpatient and outpatient services, including emergency services, critical care, and ambulatory surgery. The hospital is equipped with specialized facilities for cancer services, behavioral health services, and cardiac catheterization, ensuring that patients receive specialized and high-quality care.

In 2018, St. Peter's Health Partners completed a significant construction project aimed at modernizing and enhancing the hospital's facilities. This project included the development of a new patient pavilion, which houses an expanded emergency department designed to handle a higher volume of emergency cases efficiently. Additionally, the pavilion includes a new Intensive Care Unit (ICU), Progressive Care Unit (PCU), and updated Medical/Surgical (Med/Surg) units, all of which are equipped with state-of-the-art medical technology and designed to provide a comfortable and healing environment for patients.

To accommodate the increased patient and visitor traffic, a new parking garage was also constructed, providing ample parking space and improving accessibility to the hospital. This modernization project reflects the hospital's commitment to offering advanced medical services and enhancing the overall patient experience.
